Take the first step toward your future career at control.IT! Continue to develop your skills and your career together with us.

**To strengthen our team and for an immediate start, we are currently looking for:**

## **Consultants for Controlling/Data Warehouse (m/f)**

### **Your tasks:**

You will oversee projects in the field of Controlling, Data Warehouse and portfolio- and risk management at large and well-known companies. From the initial entering of requirements and the conception creation to the realization and application assistance, you are always primary point of contact for our customers on-site. Our projects are increasingly international oriented. As a result you will also be employed in foreign countries, like France or United Kingdom. With increasing experience you will have the chance to take the responsibility for your projects, so that you will independently manage projects.

### **Your profile:**

You have successfully completed your studies of business administration or business informatics, ideally with main focus in controlling. Our national and international customer projects require an occupational mobility from your side and the enthusiasm to strike new paths. You are not afraid to apply your good English knowledge on the international stage. Our software is database-oriented, therefore a very good knowledge of MS Excel and practical experience in in SQL are of a great advantage. Very good analytical skills and the recognition of business management interrelationships complete your profile.

### **Our offer:**

With our corporate culture we will support you to develop your potential – because design flexibility, flat hierarchies, further education and internationality are firmly anchored in it. Look forward to challenging projects and living collegiality in an international environment. We offer our employees a secure job as well as profit-sharing in addition to the remuneration. Actively join us in shaping the future; together we can reach our goal!

### **Have we awakened your interest?**

Great, then take the chance to convince us that you are the ideal candidate. Please send your detailed application along with your salary expectations to [startpunkt@controlit.eu](mailto:startpunkt@controlit.eu), attention Ms. Langer.
