Take the first step toward your future career at control.IT! Continue to develop your skills and your career together with us.

**To strengthen our team and for an immediate start, we are currently looking for:**

## Developers (m/f)

### Your tasks:

In collaboration with our European partners you will work on international projects and together with your colleagues you will develop applications for the management of fund investments and risk management. Another key area of your work will be the further development of our already existing software as well as the integration of it into a common software suite. Furthermore, you will develop methods of resolution for individual customer requirements in coordination with our consultants and sales.

### Your profile:

Job applicants should have an economic or IT-degree or a comparable training incl. several years of professional experience as software developer in the area of .NET development under C#. From the professional point of view you have a competent knowledge of a release compatible development of standard software, and in addition to that you should be familiar with using large databases. Optimally, you also have experience with COM/COM+ (Enterprise Services) class. Your strengths include finance-mathematical and business know-how as well as logical thinking. A good knowledge in English as well as a self-sufficient and solution-oriented approach complete your profile.

### Our offer:

With our corporate culture we will support you to develop your potential – because design flexibility, flat hierarchies, further education and internationality are firmly anchored in it. Look forward to challenging projects and living collegiality in an international environment. We offer our employees a secure job as well as profit-sharing in addition to the remuneration. Actively join us in shaping the future; together we can reach our goal!

### Have we awakened your interest?

Great, then take the chance to convince us that you are the ideal candidate. Please send your detailed application along with your salary expectations to [startpunkt@controlit.eu](mailto:startpunkt@controlit.eu), attention Ms. Langer.
